

Foreign exchange market (November, 2013)

Graph 1. Net inflow (outflow) of noncash US dollars in commercial banks (million USD)

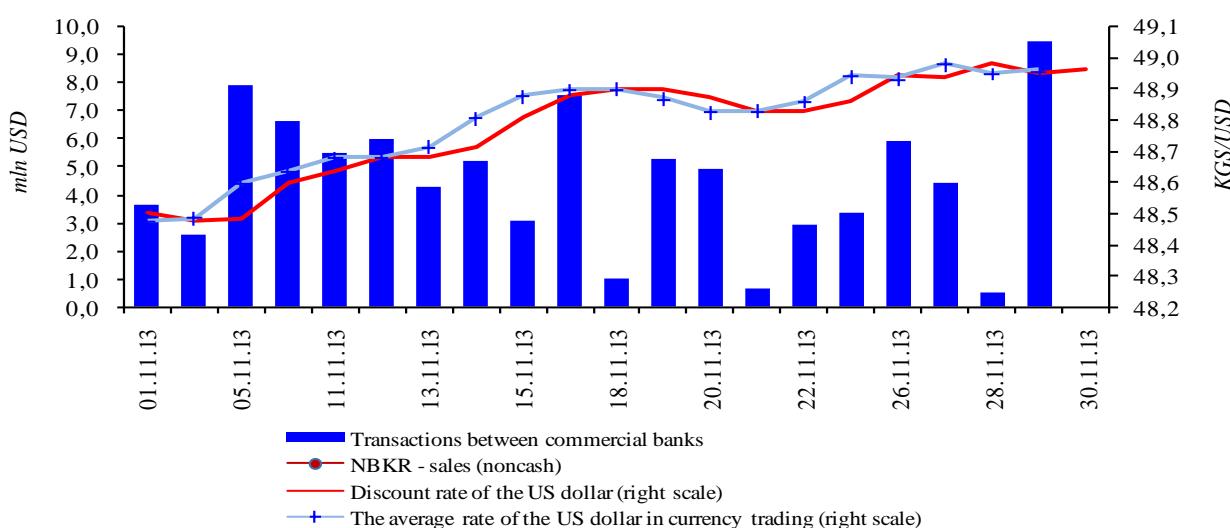

In general, in the reporting period upward dynamics of the exchange rate of the US currency continued – from 48.5027 to 48.9590 soms per US dollar, which occurred against the backdrop of increasing monthly indicator of the volume of buying and selling of non-cash currency in the interbank currency market (in November 2012 rate also increased compared with the previous month by 0.3 percent). One of the main reasons for the increased demand for foreign currency was the increase of transactions of commercial banks servicing clients' contracts for the importation of goods and services in a growing trade deficit.

The total volume of transactions for the purchase and sale of foreign currency decreased by 21.7 percent, formed at 33.6 billion soms. The reason was a significant decrease in business activity in all segments of operations: non-cash transactions of commercial banks - by 31.2 percent to 4.9 billion soms, cash transactions of commercial banks - by 21.9 percent to 24.7 billion soms, cash operations of exchange offices by 3.2 percent to 4.0 billion soms.

Aggregate turnover of interbank currency trades decreased to 90.9 million US dollars (by 30.4 percent) due to a corresponding reduction in transactions between commercial banks. In the reporting period, the National Bank did not make interventions (in the corresponding period in 2012 the intervention also were not conducted) (Graph 2).

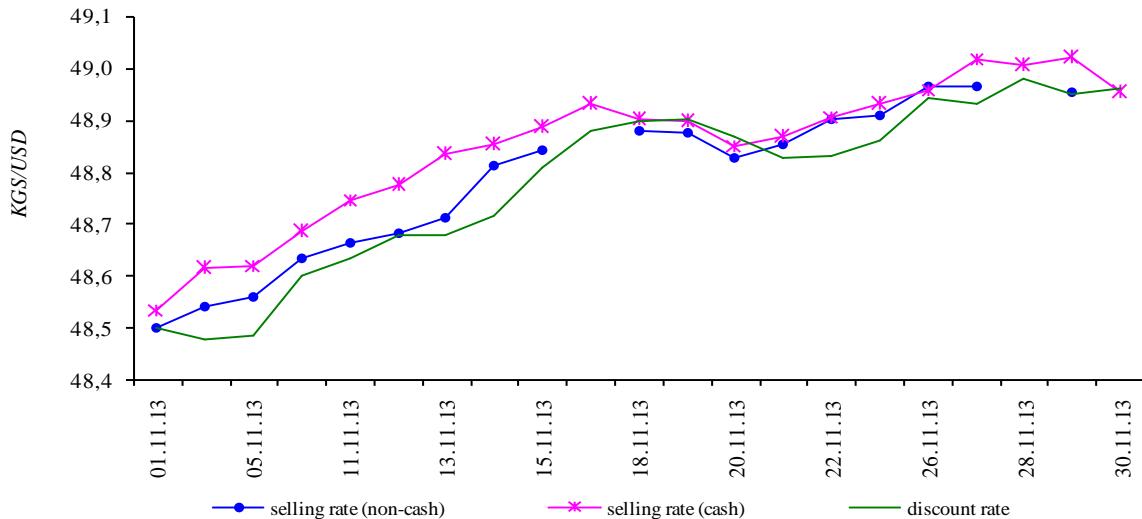

Graph 2. Dynamics of the USD rate and volume of transactions on the interbank currency trades

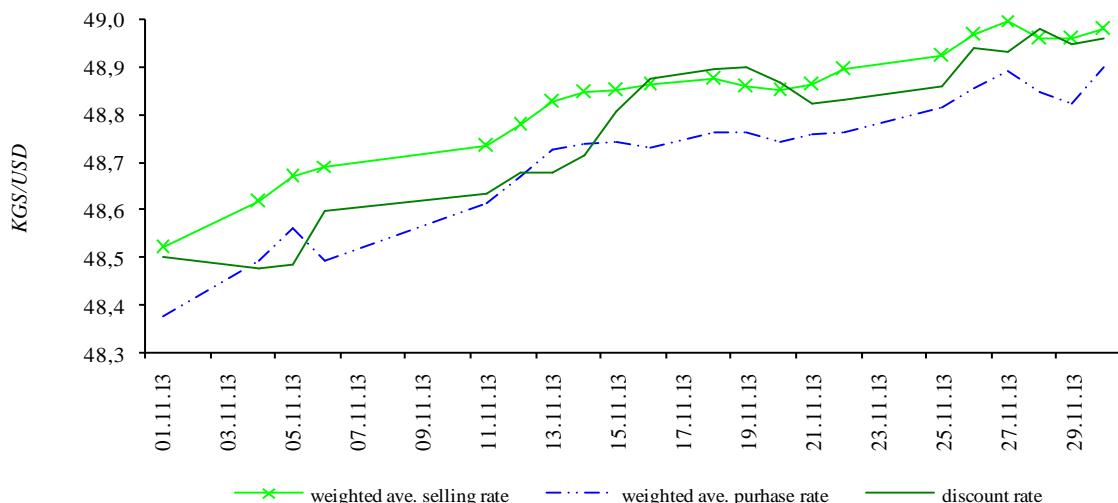

In the reporting period, the National Bank did not conduct SWAP-operations with commercial banks. In the layout for main currencies it was observed a decline in transactions in US dollars, Euros, Russian rubles and Kazakh tenge. At the same time share exchange ratio

in the total volume of transactions was distributed as follows: the share of transactions in US dollars increased by 2.0 percentage points to 61.5 percent; in ruble decreased by 1.9 percentage points to 27.8 percent. The share of transactions in the Kazakh tenge was 7.7 percent, an increase over the month by 0.6 percentage points in the euro was 3.0 percent (-0.7 percentage points).

Graph 3. Dynamics of rate of non-cash and cash US dollar sale in commercial banks

Graph 4. Dynamics of US dollar rate in the exchange offices

Graph 5. Dynamics of rate of change of main currencies rates in the exchange offices and US dollar rate in the world markets
